ORIGINAL

Recycling bin with Information panels B2

Description: Well visible outer walls made of stainless steel. Upward facing openings, designed for covered areas. All doors contain transparent plastic panels for individual design or the option to use and them as advertising space. An integrated, theft-proof ashtray or flat cover on the top is a standard equipment.

Safety: The ashtray/cover is secured by a snap mechanism.

Handling: The galvanized inner liners swing out wide when the doors are opened. The waste bags can now easily be changed. The snap lock allows the door to be closed and locked without a key.

Handling of the information panels: Open the door and unscrew the Phillips screws in the upper frame on the lock side. The frame can now be opened and posters can be exchanged.
