SPECIAL

Transparent single bin FT1

Description: Self-supporting, curved fronts with integrated transparent acrylic panel and straight stainless steel side panels, secured with an internal construction made of galvanized steel, provide stability. The funnel-shaped opening of the top guides waste into the inner liner.

Safety: A snap lock protects the bin against unauthorized access and secures removable accessories (if required) against theft.

Handling: Quick and easy removal of the waste bag from above. The top is opened after operating the lock (1/4 turn) and can be swung backwards manually. The contents are now visible and the waste bag can be replaced.
