## SPECIAL

### Hanging bin Spectra

**Description:** Self-supporting body, with curved back, straight front- and side panels. Sturdy internal construction made of galvanized steel. Single or multiple colour, powder coated. Flat cover sloping towards the front, firmly connected to the body. The tilted cover results in a reduced insertion height. Integrated ashtray with perforated stainless steel grid (stub-out surface). Separate collection of ashtray contents, detached from waste collection. A U-shaped profile on the back of the body for universal mounting on round as well as square posts.

**Safety:** The snap lock protects the container against unauthorized access. The cover reduces the insertion height.

**Handling/ Emptying:** Suitable container/ bag to placed underneath the bin. The bottom flap which is fastened on one side can be opened with a key (1/4 turn). The lock is integrated in the front part of the bin for simplified access. Simultaneous emptying of the waste chamber and the ashtray is ensured.

**Handling of closure/locking:** Bottom flap is pushed upwards until it latches into the lock.
