|---------------------------|---|
| Volume | 50 / 70 / 50 Liter |
| Compartments | 3 |
| Casing material | 1.4301 (AISI 304) stainless steel, brushed |
| Casing material thickness | 1,5 mm |
| Inner liner material | galvanized steel leakproof |
| Width | 972 mm |
| Depth | 492 mm |
| Height | 857 mm |
| Weight | approx. 60,0 kg |
| Slot size | 140 x 140 mm |
| Accessories / Options | see FEATURES |

TEMPTATION

Recycling bin FF3

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The tops funnel-shaped openings guide waste into the inner liners and are also an elementary part of the fire protection (patented and certified).

Safety: The galvanized inner liners are sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liners / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire. A snap lock protects the receptacle against unauthorized access.

Handling: Quick and easy removal of the waste bags from above. The top part of the bin automatically swivels upwards by means of a gas spring after operating the lock (1/4 turn). The contents are now visible and the waste bags can be replaced as required.
