

TEMPTATION

Recycling bin, covered FF20

Volume	50 / 50 Liter
Compartments	2
Casing material	1.4301 (AISI 304) stainless steel, brushed
Casing material thickness	1,5 mm 2,0 mm (cover)
Inner liner material	galvanized steel leakproof
Width	710 mm
Depth	392 mm
Height	1052 mm
Weight	approx. 45,0 kg
Slot size	140 x 140 mm
Accessible height	841 mm
Accessories / Options	see FEATURES

TEMPTATION

Recycling bin, covered FF20

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The tops funnel-shaped openings guide waste into the inner liners and are also an elementary part of the fire protection (patented and certified).

Safety: The galvanized inner liners are sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liners / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire. A snap lock protects the receptacle against unauthorized access.

Additional coverage of the openings for unprotected/ outdoor areas.

Handling: Quick and easy removal of the waste bag from above. The top is opened after operating the lock (1/4 turn) and can be swung backwards manually. The contents are now visible and the waste bag can be replaced.
