

Datasheet 01.019 11.2023

TEMPTATION Recycling bin FAJP2x100

Volume	100 / 100 Liter
Compartments	2
Casing material	1.4301 (AISI 304) stainless steel, brushed
Casing material thickness	1,5 mm
Inner liner material	galvanized steel
	leakproof
Information area	transparent
	polyethylene sheet
	757 x 601 mm
Width	970 mm
Depth	490 mm
Height	900 mm
Weight	Approx. 68,0 kg
Slot size	250 x 140 mm
Accessories / Options	see FEATURES

Datasheet 01.019 / Technical Information 11.2023

TEMPTATION Recycling bin FAJP2x100

Description: Self-supporting, curved fronts and flat side panels made of stainless steel, secured with an internal construction of galvanized steel, provide great stability. The tops funnel-shaped openings guide waste into the inner liners and are also an elementary part of the fire protection (patented and certified).

Safety: The galvanized inner liners are sealed by a patented system. In the event of a fire, the rising smoke gases collect below the funnel-shaped openings. The resulting gas cushion interrupts the oxygen supply and a self-extinguishing effect occurs. In addition, the construction (inner liners / outer body) minimizes the increase in temperature at, above and below the casing in the event of fire.

Handling: Quick and easy removal of the waste bags from above. The top part of the bin automatically swivels upwards by means of a gas spring after operating the pushbutton lock. The contents are now visible and the waste bags, as well as the frame insert can be replaced as required.

Handling of the information area: the poster can be accessed once the top part of the bin has been lifted (via pushbutton lock) and is simply pulled out from the top.
